

Solutions for Live Streaming, Webcasting, On-location Recording

StreamingEventsTV is a live events service of Mickella Solutions, Inc. We provide on-location services, such as live streaming, recording, broadcast mixing, content capture and encoding solutions for conferences, workshops, training seminars, concerts, music festivals and other events. We can provide you with the technical assistance, equipment and knowledgeable on-site staff for your next production. We are not hindered by the size of your event or the specific needs that you have. Our website and services are backed by a custom-designed platform and a Content Delivery Network (CDN) to support the streaming and hosting of any event.

We are experts at content acquisition and content distribution. We can capture and record your event, then stream it to your online audience. Our solutions are customized to your specific needs and priced for the variables of your unique event.

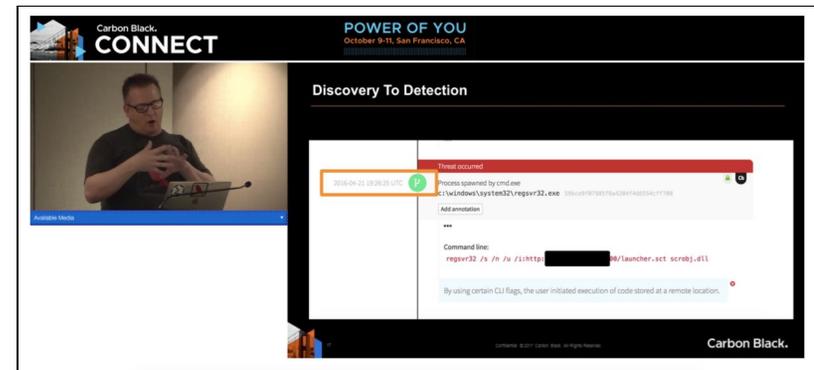

We are committed to ensuring that your needs and expectations are met, regardless of the size of your event. From a **piano recital** to an **all-day music festival**; from streaming a **wedding ceremony** to webcasting a **conference**. We are capable and flexible to handle it.

StreamingEventsTV is a live event solution, provided by **Mickella Solutions, Inc.** We provide high quality audio recording, video capture, encoding, and streaming solutions.

LIVE STREAMING QUOTE REQUEST

The following questions will help us better understand your needs and allow us to give you a quote and a plan that will match your expectations for your event. To the best of your knowledge:

1. What is the start and finish time for your event (if multiple days, please include the number of days)?
2. How many presentations/sessions will there be at the event?
3. How many attendees are expected in the local audience at the live event?
4. How many people do you expect to view the webcast online?
5. What content will be streamed to viewers? Check all that apply: Video of Sessions , PowerPoints/Slides , Other Graphics
6. Where will the webcast be distributed/viewable (your current website, our website, a special micro-site or a video platform like YouTube or Facebook, etc)?
7. Does the webcast need to be secured/protected (private link, password-protected page, registered-access only)?
8. Does attendee personal data need to be captured (via registration)?
9. Will online attendees need to interact during the event (live chat, Q&A, etc)?
10. Is any social media interaction or customizations required on the livestream page (download links, twitter feeds, Slido, etc)?
11. Is online viewer access required after the live event (DVR, on-demand, archived, etc)?
12. Do you have special requests or restrictions for the webcast (360 video, geographic blocking, audio translation, closed
